

# Sher™ Comfort Series Half-Sole Inserts

The Sher™ Comfort Series offers a full range of half-sole inserts to address a variety of conditions. All made from high-quality EVA/fabric laminate with different firmnesses to meet your patients' needs. Dual-layer construction for durable, long-term wear.

## Features:

- **Extremely thin and lightweight** for long lasting comfort
- **Durable, quality material** that retains its form for extended wear
- **Breathable polyester top cover** reduces perspiration and shear to minimize blisters or calluses
- **Anatomically designed** to provide full arch support across the foot, formed medial/lateral sides help prevent ankles from rolling inward
- **Deep heel cup** cradles and stabilizes the foot
- **Half-sole length** relieves pressure on the forefoot
- **Usable in a wide range of shoe types**, can easily be moved from shoe to shoe
- **Available in five designs**
